Each 30 minute quadrangle (shown in blue) is identified in the southeast corner by a six digit number showing successive degrees of latitude, degrees of longitude, and position in its one degree quadrangle.

Note: Data may be requested by quadrangle county, or other unit. Some quadrangles of data in quadrangle units may not be complete for this State, requests for information by quadrangle number will be supplied with data in whatever form is available.

Additional triangulation in the areas outlined by heavy broken lines will be found on triangulation diagrams indicated by numbers.
